

College Now Things to consider...

before you commit

It's never too early to start exploring!

To facilitate career exploration, students are encouraged to use the FOCUS 2 platform. FOCUS 2 provides a variety of assessments, will generate a list of potential occupations based on the assessments, and has comprehensive information on hundreds of occupations. Scan the QR code below to get started! Use access code: hccc225 when registering.

Visit the career services page for more information:

This is the start of your College Record...

This is not to be taken lightly! How you perform in College Now will follow you after high school. "F" grades or "Ws" (withdrawals) will impact future financial aid eligibility, student standing, and possible acceptance into your dream college! Protect your academic record by only taking on what you can handle.

Quality over Quantity...

Chances are.. not every College Now credit is going to count in your future program of study. Taking too many college credits might take away the opportunity to take open electives and explore potential majors/careers down the road. Be selective in your choices and whenever possible- plan ahead! A great plan that will give you a really good start with minimal credit waste.. only take 1 of each Gen Ed category. Advisors are here to help you navigate this. Whether you are decided or undecided on future college plans, we can inform you of the courses that will be most beneficial for your future college goals.
